Alex Robinson

Self-Assessment

Assignment 1

During this assignment, I feel like I did roughly a third to 40% of the work. I offered to tackle writing the code for parts 2 and 4 and fine-tuned the algorithms that we discussed as a group earlier in the assignment, and I ended up doing most of the debugging as I developed the programs. It ended up taking longer than anticipated, but I'm still satisfied with what I ended up with. We coordinated well enough as a team and carried out our responsibilities as we discussed early on.
